PROFILE

Computer Science undergraduate at KL University (**9.8 CGPA**) focused on **AI/ML**, **AI agents**, and **RAG pipelines**, with a full-stack and Linux systems background. Experience spans AI/ML quality assurance, freelance IT support and development, and building Linux command-line tools and web interfaces.

EDUCATION

Computer Science Undergraduate · **KL University** — Vijayawada

Expected 2028

- **CGPA: 9.8 / 10** · Pre-final year

EXPERIENCE

AI/ML QA Summer Intern · **MidCentury**

Summer Internship

- Contributed to **AI/ML quality assurance** as a summer intern.
- Gained hands-on exposure to the quality and reliability side of AI/ML development.

Freelance Developer · Independent / Collaborative

Freelance

- Collaborated with other developers on **IT management**, routine technical repairs, **troubleshooting**, and general development and support work.

PROJECTS

HarborFlow — Microservices Operations Platform

- Built a **Spring Boot microservices** platform in Java, split into independent **Carrier, Container, Yard and Gate services** fronted by a **Spring Cloud Gateway** API gateway.
- Implemented **REST endpoints** with **PostgreSQL** persistence and **JWT-based authentication**, with **Eureka** service discovery for inter-service communication.
- Organized the codebase as a **Maven multi-module project**, managed with Git.

Linux CLI Network Analysis Tool

- Built a **command-line network analysis tool** for Linux (Ubuntu), focused on network and system analysis from the terminal.

Linux Intercommunication System

- Built an **intercommunication system for Linux** as a system-level project.

Frontend Deliverables & Custom Sites

- Developed **frontend deliverables, custom websites**, and practical web interfaces.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C, SQL

AI/ML: RAG Pipelines, AI Agents

Full-Stack: Spring Boot, Spring Cloud, Next.js, React, Node.js, Tailwind CSS, PostgreSQL, REST APIs, JWT

Infrastructure: Docker, Linux (Ubuntu), Git, Maven, CI/CD
